$z = wx + b$反向传播

复合函数导数的链式法则，计算每个叶子节点梯度

$$\frac{\partial z}{\partial x} = \frac{\partial z}{\partial v}\frac{\partial y}{\partial x} = w$$

$$\frac{\partial z}{\partial w} = \frac{\partial z}{\partial v}\frac{\partial y}{\partial w} = x$$

$$\frac{\partial z}{\partial b} = 1$$
